SERVICES

Body Paint Protection Coating

We are using the latest technology in paint protection coating by **Gtechniq**; many benefits can be gained by using our ceramic coating such as:

- giving unrivalled UV resistance
- less efforts to can keep the car in the showroom conditions
- dirt repellency
- easy clean and swirl resistance up
- Lasts up to 10 times longer than dealer applied products
- enhances any gloss surface such as paintwork, glass
- swirl marks will be less in 50%
- offers sensational surface functionality and protection

Body Paint Protection Film

XPEL:

Protection Film combines best-in-class durability and clarity not previously available in the market. With its very low surface energy, our film sheds contaminants that would otherwise stain or yellow conventional films. In addition, the clear coat employs special elastomeric polymers that “heal” over time eliminating swirl marks and other fine scratches without having to do anything. This product carries a 7-10 year warranty against, cracking, peeling, staining, and hazing, covering both film and labor. The film we are using is truly the most revolutionary Paint Protection Film ever invented!

We have different range of films to match with the need of our customer:

XPEL Ultimate Self Healing Protective Film

- XPEL's Ultimate Paint Protection Film combines best-in-class durability and clarity not previously available in the market.
- With its very low surface energy, XPEL ULTIMATE sheds contaminants that would otherwise stain or yellow conventional films. In addition, the clear coat employs special elastomeric polymers that “heal” over time eliminating swirl marks and other fine scratches without having to do anything.

XPEL Xtreme Paint Protection Film

- Designed for minimal visual impact, XPEL XTREME delivers an industry-leading level of optical clarity.
- The lack of texture or “orange peel,” in this film makes it a great choice for enthusiasts who want to ensure the protective film is not visible on their vehicle.

XPEL Stealth Matte Finish Paint Protection Film

- XPEL STEALTH Paint Protection Film finally brings true protection to matte paint wraps.
- Made from a satin finish version of the same proven clear polyurethane as our UTLIMATE film, XPEL STEALTH is guaranteed to perform as great as it looks.
- XPEL STEALTH Protection Film employs the excellent conformability of our other films, making it much easier to install than vinyl, yet it can easily withstand rock and debris impacts that would normally destroy the paint underneath.
- XPEL STEALTH is also perfect for clear bra protection over painted matte finishes and matte vinyl stripes.
- Our matte finish blends in seamlessly, allowing protection to these surfaces without adding gloss.
- This makes XPEL STEALTH a great film for race cars, hot rods, customs, and even exotic factory paints.

Interior Cleaning and Detailing

- A car vacuum
- Upholstery cleaner (for vinyl, cloth, leather)
- Upholstery protector (for leather, vinyl or fabric)
- Carpet cleaning product and stain remover
- High performance professional steam cleaner offering deep, chemical-free cleaning
- Glass cleaner (for glass and mirrors)
- PH balance shampoo and a cleaning brush for floor mats
- Through using our products, spilled liquids simply rolls off the surface and can be wiped away with a damp cloth with zero staining. Our products coat each fiber individually which means the texture of the fabric remains unaffected and allowing fabric to “breathe”. Works well on convertible roofs with great durability

Paint Correction

In AutoSpa we refers to the process of removing the imperfections in a vehicle's finish and restoring it to an, often times, better than new state. These imperfections include but are not limited to; swirl marks or "Spider Webbing" from circular washing, automated carwashes, fine scratches, water spots, bird dropping etching, holograming caused by inexperienced detailers and the list goes on... Most common practicing detailers will fill fine scratches. In other words, your scratches are hidden and will only be revealed after you wash it several times. We are giving only the true way to remove scratches in your vehicle's paint is with the process of paint correction, one of our specialties here in AutoSpa. Once the paint has been re-leveled, your scratches are gone for good, but it does require proper maintenance to keep your car looking great after the detail to avoid putting new scratches to your paint.

Window Tinting

From Madico

Premium cars require matching performance from their windows. Wincos "Window Cosmetics" Automotive films pair natural beauty with sound scientific research for the ultimate in window film style and performance.

Achieve high heat rejection without the look of dark, tinted windows with Wincos Automotive Films.

- Lifetime, no-fade warranty
- Improves comfort due to maximum heat and glare reduction
- Improves personal safety by blocking 99% of UV rays
- Reduces fading of vehicle's interior
- Helps hold shattered glass together in the event of an accident
- Extreme IR rejection – up to 98%

Madico's Charcool® auto tint combines classic looks with contemporary functionality to deliver everything you need in an auto film—along with added benefits.

Charcool® is a cutting edge extruded film that never changes color.

- State of the art extruded film
- Improves comfort due to maximum heat and glare rejection
- Reduces fading of vehicle's interior
- Improves personal safety by blocking 99% of UV rays
- Non-metal construction eliminates signal interference
- Helps hold shattered glass together in the event of an accident

Onyx® films offer exceptional heat rejection and increased passenger privacy while reducing dangerous glare. In addition to a cooler, more comfortable ride, Onyx provides a high level of fade resistance to help keep your interior looking new for years to come.

Onyx® is a high performance film designed for high heat rejection.

- High performance metalized film
- Helps hold shattered glass together in the event of an accident
- Improves comfort due to maximum heat and glare reduction.
- Reduces fading of vehicle's interior
- Improves personal safety by blocking 99% of UV rays

Windscreen Protection Film

ClearPlex is the first and only optically- clear protection film for auto windshields. This patent- pending products absorbs the impact of standard road hazards.

ClearPlex Protects Windows on All of Your Vehicles.

The Best Windshield Protection You'll Never See

- ClearPlex® is the first and only optically-clear protection film for auto windshields.
- This patented product absorbs the impact of standard road hazards.
- Significantly reducing the occurrence of rock chips, pitting and bull's-eyes.
- Leaving the glass in pristine condition.
- A multi-layer film that adheres to the windshield, but can be removed at the end of its useful life.

Impact and Scratch Resistant

- ClearPlex® is designed to take what the road dishes out.
- Impacts which shatter unprotected glass leave only a minimal pin-point on the film, preserving its optical clarity.
- Like glass, ClearPlex® is scratch-resistant and stands up to everyday abrasions, such as windshield wipers.

Reduce Heat, UV & Glare

- ClearPlex® features UV stabilizers which reduce the amount of heat in your vehicle and helps prolong the life of your interior.
- With its polarized finish, the film can help reduce glare.
- Thermally fitted to your windshield.
- Depending on the windshield, installing ClearPlex® can take less than a half an hour by a certified installer.
- The film is thermally fitted to every curve of the windshield, forming a bond with the glass.

Environmentally Friendly, Providing a Sustainable Solution to Windshield Repair

- Avoids the unnecessary pollution of broken windshield glass in landfills.

Safety for Vehicle Occupants and Protecting the Value of your Automotive Investment

- The windshield is responsible for about 20% of a vehicle's structural integrity.
- An intact windshield can prevent a vehicle from roof from collapsing in an overturn, and it can help to keep passengers inside the car.
- ClearPlex® film can help to preserve a windshield in an accident, thereby protecting the vehicle occupants and the vehicle itself.
