

ACCESS CONTROL SYSTEM CATALOGUE

INTRODUCTION

ACCESS CONTROL SYSTEM PRESENTATION

'Derby' has a heritage of ironmongery since 1734. Keeping an array of traditional hardware 'Derby access control' is under continuous research and development; keep on extending the product line. Derby is envisioned to serve the construction industry across the globe focusing UK, Europe, Middle East and northern Africa.

Our dedicated and qualified team of GAI trained consultants is obtainable to offer their service to any sophisticated project requirement of architectural hardware. Irrespective of the project size, we provide project advices, cost saving intelligence on architectural hardware solutions. The Derby technical service team is always equipped with the suitable elucidations for your project. Derby would provide the support in all the stages of a project in utmost commitment. The supply chains are synchronized to get the best out of them. We are intended to give the awareness gatherings and seminars under the regulation of RIBA.

Derby is headquartered in United Kingdom and enjoying a wide reach of globe through the appointed and established distributors. As a responsible brand, we are committed to follow the best standards and conditions throughout our production line. Strictly adherent to the quality procedures, our current product lines are for the European projects and projects following the BSEN standard specifications.

Considering the project management, Derby would provide door by door ironmongery schedule along with the bill of the materials. On request we provide installation drawings and specially featured or customized ironmongery. As a quality product Derby comply with required certifications.

Our dedicated research and development wing comes out with innovative new age locking solutions that keeps us diverse from the competing brands.

The ironmongery products Derby offers befitted to the rich history of UK ironmongery tradition. We are committed to mark our presence in the architectural hardware industry.
