AL KHALILI

# SYSTEMS & ELECTRICAL INSTALLATION

Building Leadership through technology differentiation and implementation, Al Khalili Systems & Electrical Installation aims to be among the leading system integrators by providing IT Solutions, Network & Telecom Solutions , Structured Cabling, Surveillance & Security Solutions and Automation Solution to the customers in United Arab Emirates . Al Khalili Group began its journey. to the top as a modest business in the early 70's. Over the decade it has grown as one of the leading multi-faceted infrastructure company with an essential role in the economy.

We represent reputed manufacturers from across the world and cover a wide customer base across varied market sectors of the UAE. Our professional team is trained to handle the complex requirements of large projects.

Our dedicated team of engineers ensures that all standards and regulatory requirements are met. We are equipped with the latest software and industry knowledge to design any complex system. Our flexible and integrated approach towards projects, both big and small, enables us to provide innovative design solutions that are tailored to meet our customers' specific requirements.

## PRODUCT PORTFOLIO

### LIGHTING CONTROL

The world's ever increasing demand for energy is rapidly changing our environment and the need for energy efficiency in every aspect of our daily lives has never been greater.

We offer a comprehensive range of energy saving lighting control solutions from basic presence detection to fully integrated Open Platform control and monitoring systems to ensure easy inter-operability between different systems also Client can monitor and control the entire lighting system and energy usage from a dashboard.

## PRODUCT PORTFOLIO

### GUEST ROOM MANAGEMENT SYSTEM

Our guest room management system offers an integrated approach which interconnects the guest room with a central control system.

The system manages different scenarios in each guest room, including welcome, living and sleeping settings. Lighting, temperature and curtains can be controlled to suit the activity of the occupant. Settings can either be adjusted in the room by the guest or centrally via the hotel management system.

Our guest room management system can be integrated into any Building or Property Management System (PMS) to help reduce running costs and increase the efficiency of your building. We are partnered with the leading manufacturers and our presales and post sales team is trained by them to carry out the design and installation.

### HOME AUTOMATION SYSTEM

To give you an overview, following are some benefits of our smart home system:

- Easily manage the energy consumption of your house and reduce your energy bills by always being in control regardless of your location.
- You can control your home entertainment systems with your mobile phone or your tablet, with just a touch, a swipe or even your voice.
- You can answer your door from any phone in your house.
- You can even program your locks to automatically unlock at certain intervals or you can unlock the doors with your cell phone.
- Receive notifications such as text messages, emails and security camera footages when people enter your house or exits your house.

We believe in making homes smarter and more secure. Our smart home system give you the ability to control your home's lighting, security, appliances, thermostat and many other devices; and that too from anywhere! Turn off the lights or the thermostat of your house while you are at work using your cell phone or maybe you can use your tablet to receive real time video coverage from your house's security camera. Whether you are at home or you are on the go, our smart home system give you the opportunity to control your house from any nook or corner of the world!
